PROFESSIONAL SUMMARY

Results-driven Software Engineer with 2+ years of experience architecting and delivering scalable enterprise web applications using React.js, Vue.js, Angular, .NET Core, and Node.js. Proven track record of building reusable component libraries, integrating REST APIs within microservice architectures, and deploying cloud-enabled applications on AWS. Adept at leveraging AI tools (GitHub Copilot, OpenAI APIs) to accelerate development cycles. Strong practitioner of Agile/Scrum methodologies, automated testing (Jest, Vitest), CI/CD pipelines, and performance optimization with a focus on production stability.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, C#
Frontend	React.js, Angular, Vue.js, HTML5, CSS3, Tailwind CSS, Bootstrap, PrimeVue
Backend	.NET Core, ASP.NET Core, Node.js, Express.js
Cloud & Databases	AWS (CloudFront, EC2, S3, IAM, RDS), MongoDB, SQL Server, Redis
Testing & DevOps	Jest, Vitest, React Testing Library, Docker, Git, GitHub, CI/CD Pipelines, Postman
Architecture	REST APIs, Microservices, GraphQL, JWT Authentication, SPA, Responsive Design, System Design
AI & LLM Tools	GitHub Copilot, Claude AI, OpenAI APIs, LLM Integration

PROFESSIONAL EXPERIENCE

Cybage Software

Nov 2023 – Present

Software Engineer — Enterprise Products Division

- Architected and delivered scalable React.js and Vue.js front-end applications for enterprise financial products, improving usability and end-to-end reliability across customer-facing modules.
- Engineered reusable component libraries adopted by 3+ product teams, reducing feature development effort by 15% and accelerating release cycles.
- Integrated REST APIs with .NET Core backend services in microservice-based architectures, ensuring seamless, secure data flow across distributed systems.
- Optimized UI performance via lazy loading, memoization, and code splitting, delivering measurably faster page loads and smoother user interactions.
- Implemented comprehensive unit and integration tests using Jest and React Testing Library, achieving 95% test coverage and significantly reducing production defects.
- Enforced coding standards through structured pull request reviews and GitHub workflows, elevating overall code quality and reducing technical debt.
- Leveraged GitHub Copilot and Claude AI to accelerate development velocity and maintain code consistency across sprint deliverables.
- Participated in Agile/Scrum ceremonies — sprint planning, standups, retrospectives — consistently delivering features on schedule.

PROJECTS

Social Media Platform

Angular, Node.js, Express.js, MongoDB, JWT, OpenAI APIs

- Designed and built a full-stack social media application with an Angular front end and Node.js/Express.js backend, supporting dynamic user-generated content at scale.
- Implemented JWT-based authentication and role-based access control (RBAC) to secure user sessions and protect sensitive data access endpoints.
- Designed a scalable NoSQL data model in MongoDB to efficiently manage growing volumes of user-generated content and social interactions.

Hospitality & Travel Booking Platform

React.js, Zustand, REST APIs, Jest, Responsive Design

- Developed a full-featured travel booking platform with React.js and Zustand state management, delivering a seamless cross-device booking experience.
- Integrated third-party REST APIs to power real-time availability checks, dynamic pricing, and end-to-end booking workflow automation.
- Built a reusable, responsive UI component library that reduced front-end duplication and improved developer productivity across the project.
- Implemented Jest-based test coverage across critical booking flows, ensuring high reliability and regression safety ahead of each release.

Enterprise Financial Partner Management Platform AI-POWERED

Vue.js, .NET Core, AWS S3, C#, Vitest, REST APIs

- Built an AI-powered partner and customer success portal enabling streamlined partner onboarding, account management, and automated workflow orchestration.
- Designed responsive Vue.js interfaces backed by .NET Core microservices for secure, real-time financial data handling and compliance workflows.
- Implemented AWS S3 integration for scalable document storage and retrieval, supporting audit and compliance requirements within the platform.
- Wrote automated tests using Vitest to validate business-critical financial features and ensure application stability across iterative releases.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering

2019 – 2023

KIIT University | CGPA: 8.0 / 10
